NOTICE TO MARINERS

No 26 of 2014

FUGRO SEACORE LTD NOTICE TO MARINERS SWANSEA BAY TIDAL LAGOON GROUND INVESTIGATION WORKS

Description of Works

Fugro will be conducting geophysical and geotechnical surveys in the Swansea Bay area, commencing on or around the 11th September 2014 until mid-October (weather dependant). The vessels involved are listed below.

The Skate 3E jack up barge will be conducting ~25no sampling boreholes. Operations onboard the jack up barge will take place on a 24hr and 7 day basis. The barge will be manned at all times whilst conditions are within the vessels operating limitations.

The Coastal Chariot multicat will be conducting sampling at various locations within the described survey area. It will operate on a 12hr and 7 day basis.

Vessels/vehicles/members of the public should keep well clear of the barge at all times (minimum of 100m clearance from barge). The barge will be assisted during moves between locations by a small tug. Crew transfers will take place several times per day between Swansea dock and the site using a Rigid Inflatable Boat (RIB).
