

NOTICE TO PORT USERS AND TENANTS

ESSENTIAL REPAIRS TO PORT TALBOT SEA LOCK – DECEMBER 2014 TO JANUARY 2015

The proposed program of works is as follows:

- Works are expected to start on the AM tide of 20th of December 2014 and continue to the PM tide on the 14th of January.
- The last tide that vessels can be accepted in the lock will be the PM tide on 21st of December
- Normal service will be resumed with effect from PM tide of 15th January.

It is hoped that once the outer gates are removed and various structures have been properly inspected it may be possible to reduce the restriction by several days. ABP will advise all parties as soon as practicable with regard to any reduction in time that locking restrictions will be in place.

We appreciate your support whilst these essential works are being undertaken and apologise in advance for any inconvenience caused.

R Lewis
Pilot Manager/Deputy Harbour Master South Wales
